

POLYCET

Polycet Syllabus

The TG POLYCET Syllabus 2026 has 4 sections which are Mathematics, Chemistry, Biology, and Physics. Students willing to secure exemplary marks in the exam are advised to follow the syllabus. Following the syllabus will help the students in studying the relevant topics that are important for the POLYCET Exam.

TG POLYCET 2026 Mathematics Syllabus

The topics for the TG POLYCET syllabus are as follows:

- Polynomials
- Basic Operations on sets
- Sets and their representation
- Arithmetic Progression
- Applications of Trigonometry
- Straight Lines
- Quadratic Equations
- Real Numbers
- Statistics
- Circles
- Logarithm
- Similar Triangles
- Probability
- Tangents and Secants to Circle
- Constructions
- Mathematical Modelling
- Trigonometry
- Pair of Linear Equations in two variables

TG POLYCET 2026 Physics Syllabus

- Human eye and colourful world
- Reflection of Light at curved Surface
- Refraction of light at curved surface
- Electromagnetism
- Electric Current

TG POLYCET 2026 Chemistry Syllabus

- Classification of Elements and Periodicity
- Chemical Equations and Reactions
- Chemical Bonding
- Principles of Metallurgy
- Structure of atom
- Carbon and its compounds
- Acid, Bases and Salts
